JUTE RUGS

JUTE RUGS

A jute rug is a type of rug made from jute fibers, which are derived from the natural plant *Corchorus* species. Jute is a strong, durable, and eco-friendly fiber that is often used in the production of textiles, ropes, and rugs. Jute rugs are popular for their natural, rustic, and organic appearance.

These rugs are typically woven or braided and have a coarse texture, although some are softer depending on the weaving method. They are often beige or light brown in colour, which gives them a warm and earthy look. Jute rugs are favoured for their sustainable qualities, as jute is a renewable resource that grows quickly and requires minimal water and pesticides.

They are great for adding a natural touch to home decor, and while they can be durable, they may require more maintenance compared to synthetic rugs, as they can be prone to shedding and staining.

JUTE RUGS

At ABIHA LIVING, we specialise in providing eco-friendly, high-quality home décor products with a focus on sustainability. One of our flagship products is our premium collection of jute rugs. Made from natural jute fibers, these rugs combine durability with organic charm, offering customers a sustainable and stylish option for their homes.

Our Jute Rug Collection

Our jute rugs are crafted from 100% natural jute, a biodegradable and renewable material known for its strength and versatility. Whether you're looking to add warmth to your living room, bring a rustic touch to your bedroom, or create a welcoming entrance with a natural look, our jute rugs are the perfect solution.

Key Features:

- **Eco-Friendly:** Made from sustainable jute fibers, our rugs contribute to a cleaner, greener planet.
- **Durable & Long-Lasting:** Known for their strength, jute rugs stand up to everyday wear and tear.
- **Versatile Designs:** Available in a range of sizes, colours, and weaving patterns to complement any home style.
- **Natural Aesthetic:** Adds warmth, texture, and an organic feel to your home décor.
